PRICE	N/A
COMPANY	OASIS Medical, Inc.
PHONE	(800) 528-9786
WEB	www.oasismedical.com
KEY FEATURES	
<ul style="list-style-type: none"> • Reportedly avoids collapse of the anterior chamber by creating a closed system • Length of 10.5 cm • Tip fits through a 4-mm incision 	

OASIS Medical, Inc. (Glendora, CA), introduced the E. Janach reusable instrument line to include the Macaluso Descemet's Stripping Endothelial Keratoplasty inserting device with sealing system. The instrument is titanium with a lateral winglet for the lenticle. A rubber-tipped "plunger" gently positions the lenticle so it may be easily grasped by forceps and placed in the eye. According to the company, once the plunger is in position, it creates a seal that stabilizes pressure in the anterior chamber.

TrueZoom 3D Camera

PRICE	N/A
COMPANY	TrueVision Systems, Inc.
PHONE	(805) 963-970
WEB	www.truevisionsys.com
KEY FEATURES	
<ul style="list-style-type: none"> • 2X instant surgical zoom and pan with memory • Up to 1,920 X 1,080 progressive scan resolution at 30 frames per second for each eye • Does not require alignment, focus, or synchronization 	

TrueVision Systems, Inc. (Santa Barbara, CA), has released the TrueZoom 3D Camera, a high-definition, real-time, image capture module. The camera is designed to mount on most surgical microscopes by replacing the eyepiece module. The TrueZoom 3D Camera then converts the optical image to a 3D high-definition digital video stream. The real-time stream allows surgeons to operate by looking at the display, and it records surgical procedures. According to the company, the 2X instant zoom feature allows physicians to instantly focus on the target without losing resolution or illumination, and it is able to micronavigate the zoomed surgical view. ■
