KEY FEATURES	
<ul style="list-style-type: none"> • Features antivaulting haptic technology • Designed with rayacryl hydrophilic acrylic material • Features amon-apple enhanced square edges 	

Rayner Intraocular Lenses Limited (East Sussex, United Kingdom) announced that it has received FDA approval for the C-flex Aspheric 970C IOL. The C-flex is an aspheric IOL designed with Rayner's anti-vaulting haptic technology, rayacryl hydrophilic acrylic material, and the amon-apple enhanced square edge for reduced posterior capsular opacification rates. The C-flex will be available in powers ranging from +18.00 to +30.00 D in 0.50 D increments. ■

**They say there's power in numbers.
We can't help but agree.**

40,000 The number of Eyetube members since March 2008

17,222 The number of people who visited Eyetube this month

2,500 The number of videos on Eyetube

961 The number of people watching a video on Eyetube today

171 The number of countries where people have visited Eyetube.net

8 The number of subspecialty surgical channels

The No. 1 Source for cutting-edge videos on the latest ophthalmic surgical techniques
