

Reichert 7CR Auto Tonometer

PRICE	N/A
COMPANY	Reichert, Inc.
PHONE	(716) 686-4500
WEB	www.reichert.com
KEY FEATURES	
<ul style="list-style-type: none"> • Automated alignment • Internal printer for record keeping • One-touch triple-measurement mode 	

Reichert, Inc. (Buffalo, NY), introduced the new Reichert 7CR Auto Tonometer with corneal response technology. It is designed with patented bidirectional applanation technology to quantify the biomechanical properties of the cornea, which reportedly permits the determination of cornea-compensated IOP. According to the company, this measurement provides physicians with a better understanding of patients' tonometry values and enhances clinicians' ability to make critical diagnoses and treatment decisions.

OIS EyeScan

PRICE	N/A
COMPANY	Ophthalmic Imaging Systems
PHONE	(800) 338-8436
WEB	www.oisi.com
KEY FEATURES	
<ul style="list-style-type: none"> • Captures live video and 5.3-megapixel digital images • Can be used with a customized base chin rest, a slit-lamp adapter, or as a handheld device • Offers seven interchangeable imaging modules 	

The OIS EyeScan (Ophthalmic Imaging Systems, Sacramento, CA) is reportedly the only portable imaging device that captures images of both the anterior and posterior segment of the eye. It functions with other devices using the fully integrated OIS Symphony Image Management Solution. The OIS

EyeScan was designed to address the shift in health care demand due to aging populations and the rapid rise in the incidence of diabetes.

Multi-tension Lid Speculum

PRICE	\$1.00 per speculum
COMPANY	Krolman Corporation
PHONE	(800) 388-3639
WEB	www.krolman.com
KEY FEATURES <ul style="list-style-type: none"> • Nonmagnetic plastic prevents magnetic jump from stainless steel suturing needles • Cranium-hugging profile reportedly provides excellent access for cataract procedures • Ships in bulk with 1,000 speculums per carton 	

Krolman Corporation (Boston, MA) introduced the new Multi-tension Lid Speculum. The instrument is constructed of featherweight plastic with ball-tipped posts that are designed to increase patients' comfort and reduce the torsion caused by metal instruments. A blunt lower blade reportedly minimizes the occurrence of ptosis. Tension can be adjusted by slowly squeezing the speculum to weaken its molecular bonds. The plastic at the hinge's apex will gradually turn from green to white as the spring tension decreases to the chosen strength. The instrument's contoured, solid eyelash defectors reportedly provide an unobstructed view and reduce the risk of infection.

MacPractice iPhone Interface 2.0

PRICE	N/A
COMPANY	MacPractice, Inc.
PHONE	(646) 305-9008
WEB	www.macpractice.com/mp/iphone
KEY FEATURES <ul style="list-style-type: none"> • Accessible from any Web browser • Users can e-mail or call patients with a tap feature • Reportedly features an intuitive user interface 	

The new MacPractice iPhone Interface 2.0 (MacPractice, Inc., Lincoln, NE) includes a new calendar, optimized performance, and updated security features. Patients' photographs, prescription history, and appointment history are accessible through the interface. When out of the office, physicians can enter clinical notes, access referring physicians, set reminders for staff, and view up-to-date daily management reports. Users can also connect to an in-office database to access schedules and patients' records. ■
