MY INITIAL EXPERIENCE WITH THE SOFTEC HD OVAL IOL

By Thomas Harvey, MD

Thomas Harvey, MD, offers an overview of the Softec HD Oval (LensteC Inc.), an oval-shaped monofocal IOL, and he provides a tutorial on the how to load the injector and implant the lens.

FLASH CROSS-LINKING OF A PRIMARY CLEAR CORNEAL INCISION

By A. John Kanellopoulos, MD

After cataract surgery, A. John Kanellopoulos, MD, performs corneal collagen cross-linking at the main incision. He applies VibeX Xtra (Avedro, Inc.; not available in the United States) in the primary corneal incision, which is placed on the steep axis.

MY FIRST CASE WITH THE SOFTFIT PATIENT INTERFACE

By Ming Chen, MD

Ming Chen, MD, shares his first case using the SoftFit Patient Interface with the LenSx Laser (Alcon Laboratories, Inc.). According to Dr. Chen, the capsulotomy was free-floating and the cortex was easier to remove compared with previous versions of the laser's software.

PHACOEMULSIFICATION OF A HYPERMATURE WHITE CATARACT

By Rahul Pandit, MD

Rahul Pandit, MD, demonstrates his technique of liquified cortical aspiration before phacoemulsification of a hypermature white cataract. ■
